

Federal Aviation Administration

Memorandum

Date: DEC 15 2011

To: All Aircraft Certification Offices
Flight Standards District Offices
Certificate Management Offices

From: David W. Hempe, Manager, Aircraft Engineering Division, AIR-100
Steven W. Douglas, Manager, Aircraft Maintenance Division, AFS-300 *DH*

Subject: Clarification and Correction to Flight Standards Information Management
System (FSIMS) Order 8900.1, Volume 4, Chapter 9, Figure 4-68, Major
Alterations Job Aid for Transport Airplanes *SW*

This memo clarifies information published in Flight Standards Information Management System, Order 8900.1, Change 159, dated June 10, 2011. Specifically, the job aid located in Volume 4, Chapter 9, figure 4-68, section 3 titled "Transport Category Airplanes Configured for fewer than 30 passengers and not operated under 14 CFR Part 121". This section is intended to apply to all Transport Airplanes, as it did in the previous version of the job aid. Furthermore, the item in the job aid section 3.I.1, for Transport Airplane Crashworthiness was incorrectly changed to the classification of STC. The correct classification for this item should be ENG.

Both corrections have been completed and will take effect in the next change to Order 8900.1, Volume 4, Chapter 9. Expected publication for this change is the first quarter of 2012. In the interim please refer to this memo for the correct job aid classification.

For questions regarding this memo, please contact Kevin Kendall in the Engineering Procedures Office, AIR-110 at (405) 954-7074, or by email at kevin.kendall@faa.gov.
